

White Paper

SenseiBot (SBOT)

Executive Summary

SenseiBot (SBOT) is a utility token designed to create value for the crypto community through an innovative ecosystem based on a mining-like participation model. SBOT enables users to earn rewards by contributing to the ecosystem, driven by an advanced trading bot. In the long term, SBOT will evolve into a currency for exchange and payment within the ecosystem, promoting sustainability and real utility. The project is supported by "Ryushi Ryu," a team of expert traders and developers, focused on transforming interactions with the crypto world.

Introduction

SBOT aims to move beyond speculation by offering a tool that generates real value through a participation model and an automated, efficient trading bot. The integration of mechanisms like buyback, burning, and liquidity provision ensures long-term sustainability. Furthermore, future projects like educational games powered by SBOT promise significant growth potential.

Problem to Solve

The crypto ecosystem is saturated with speculative tokens, often lacking utility and showing high volatility. Additionally, traditional mining and staking processes are complex or inaccessible to new users due to technical difficulty and high entry costs.

SBOT's Solution

SBOT offers an accessible participation model, enabling users to earn rewards without the complexity of traditional mining. The trading bot, developed by experts, ensures constant token buybacks, stabilizing the price and increasing its value. This approach balances immediate utility with long-term sustainability.

Technology and Blockchain

SBOT operates on the Binance Smart Chain (BSC), leveraging its advantages:

- **Transaction Speed:** Fast and efficient processing.
- **Low Fees:** Making SBOT accessible to all.
- **Interoperability:** Expansion across various platforms.
- **Security:** Robust protection for funds and transactions.

Tokenomics

The total distribution of 7 billion SBOT tokens is as follows:

- **40% Participation Rewards:** 2.8 billion.
- **15% Initial Sale (ICO/IDO):** 1.05 billion.
- **10% Liquidity for Exchanges:** 0.7 billion.
- **15% Team and Founders:** 1.05 billion.
- **10% Development and Partnerships:** 0.7 billion.
- **5% Marketing and Airdrops:** 0.35 billion.
- **5% Reserve:** 0.35 billion.

Participative Mining

SBOT's participative mining model rewards active users, fostering a community aligned with the project's goals. This model ensures sustainable management of the token's supply and liquidity.

Team

"**Ryushi Ryu**" is the pseudonym for a team of traders and programmers with over 5 years of experience in financial markets and cryptocurrencies. This combination guarantees solid technological development and well-founded market strategies to ensure the project's success.
